OCEAN BIO-CHEM, INC.

Ocean Bio-Chem, Inc., the parent company of both Star brite, Inc. and Kinpak, Inc is a manufacturer and global distributor of products for the marine, RV, automotive, powersports, health and homecare markets. Founded in 1973, Star brite began as a provider of car polishes, before diversifying into other markets. Headquartered in Fort Lauderdale, Florida, the Company trades on the NASDAQ exchange as OBCI.

The Company's main manufacturing and distribution facility, Kinpak Inc, is located on a 20-acre site in Montgomery, Alabama. The facility's 300,000 sq. ft. manufacturing, blending, packing, and distribution center features a 500,000-gallon tank farm as well as a fully-equipped R&D laboratory and a quality control center that performs quality audits for each phase of the production process.

The plant is equipped with multiple blow-molding machines to produce custom PVC and HDPE bottles in various colors and shapes. There are 12 fully-automated high-speed liquid filling lines, pail lines, drum filling line, bulk load filling lines, plus grease filling lines capable of filling containers from 1 ounce to 55 gallons in size at speeds up to 120 gallons per minute. Finished goods are secured by automatic case packers, case sealers and palletizers. In addition to 18 truck loading docks, the facility has a rail spur capable of handling 20 railcars.

Kinpak also manufactures and distributes numerous private label products.

The Company recently founded OdorStar, LLC, a manufacturer and supplier of EPA-registered disinfectants sold into the health, pet, and agricultural markets under the Performacide® brand name.

Star brite® products are available at Marine, RV, Automotive, Powersports, Farm & Fleet, Hardware, Sporting Goods, and Pet stores worldwide.

(Kit – 1 L Salt Off w/Applicator)

- Removes salt deposits from all marine surfaces
- Use as a motor flush in I/O and outboard engines
- Rinses away salt buildup on hulls, decks, rails, towers, trailers, diving equipment, rods, reels and more
- Leaves a protective polymer coating to prevent future salt damage

SALT OFF® PROTECTOR

93922	650 ml	6	F/GF

- Removes salt deposits from all marine surfaces
- Rinses away salt buildup on hulls, decks, rails, towers, trailers, diving equipment, rods, reels and more
- Leaves a protective polymer coating to prevent future salt damage

WHAT IS SALT OFF®?

Salt Off® Protector is formulated to remove salt deposits from all metal, fiberglass, vinyl, rubber, glass, plastic and painted surfaces. Tests prove that it is the most effective way to protect engines when used as a flush, as well as dive and fishing gear, and all other metal surfaces. It leaves a protective coating of special polymers to help prevent future deposits from forming.

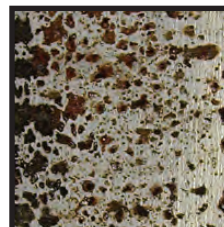

SALT OFF® APPLICATOR

NUMBER	CASE PACK
94100	6

- New, attractive retail clam packaging
- Allows easy application of Salt Off® to all metal surfaces or to flush an engine
- Reservoir attaches between garden hose and either engine flusher or spray nozzle
- On/Off Switch to control flow of water or Salt Off® to surface being treated

- Easy to use; just hand knead for 1 minute and apply to damaged area
- Can be sanded, drilled and tapped

MARINE SILICONE SEALANT

NUMBER	SIZE	COLOR	PACK
82102	83 ml	Clear	6

- 100% marine grade silicone; won't turn yellow
- Remains flexible from -60°F to +450°F
- Bonds to fiberglass, plastic, wood, glass and metal
- Unaffected by sunlight, weathering, most chemicals & solvents
- Dries tack-free in less than one hour, cures completely in 24 hours

5 MINUTE CURE EPOXY SYRINGE – CLEAR

NUMBER	SIZE	CASE PACK
93401	1 oz.	12

- Convenient self-metering syringe applicator
- Bonds fiberglass, rubber, hard plastic, glass, fabric, ceramic, and metal
- Fills cracks and holes, mounts components, seals seams
- Resists most liquids
- Crystal clear appearance after curing
- Permanent strength up to 1200 PSI

STAINS 101

THE SCIENCE OF STAINS MADE SIMPLE

Keeping your boat looking great is easy when you know the basics. Those basics include three common types of stains that can be frustrating if you don't know how to remove them. This handy *Stains 101 Guide* will help you properly identify and remove each of the three basic stains, and keep your boat looking like new.

It's the science of stains made simple!

SURFACTANT TECHNOLOGY

TO COMBAT

DIRT & GRIME

THE STAIN

Dirt, grime, gunk, muck. Fish blood, food, drinks. These are your surface stains.

THE SCIENCE

Most surface dirt will wash right off with boat soap and water. However, some gets ground in, especially on non-skid surfaces. That's where surfactants come in. Surfactant molecules fully surround the dirt molecules and lift them from the surface that you're cleaning. This allows them to be washed away with water. Chelating agents are supercharged surfactants for specialized cleaning.

THE SOLUTION

Star brite Boat Wash will definitely remove most surface dirt. For tough grime and gunk, use a cleaner/degreaser, such as Star brite Xtreme Clean or choose a surfactant based on the surface: Non-Skid Deck Cleaner for non-skid, Vinyl Clean for vinyl, etc...

85932GF

ACID TECHNOLOGY

TO COMBAT

RUST & TANNIC STAINS

THE STAIN

Tree leaves, hull stains, rust stains, waterline stains, hard water stains, orange stains.

THE SCIENCE

Tannins are naturally produced in the decomposition of plant-based matter, and their signature orange-hued stains are dyeing your hull and fiberglass. Rust stains occur on the fiberglass around metal, where water leaches color from underneath the metal and deposits it on the surface. Removing these stains requires a chemical reaction with an acid.

THE SOLUTION

Star brite Instant Hull Cleaner contains a modified oxalic acid that safely neutralizes tannins and rust. There's much more science behind it but trust us on this one, simply spray or wipe on and watch the stain disappear.

81732GF

ABRASION TECHNOLOGY

TO COMBAT

SCUFF MARKS

THE STAIN

Black shoe marks, rub rail and bumper scuffs, marks left from dragging hoses and equipment.

THE SCIENCE

Scuff marks—or "transfer stains"—happen when material is transferred onto a surface and is mechanically bonded. Chemicals are rarely strong enough to remove these marks, since many times the material that has transferred is chemical-resistant (think of a rubber shoe). These abrasive marks require the same to remove them: abrasion.

THE SOLUTION

Star brite Ultimate Magic Sponge uses nano-sized scrubbers to grab hold and erase most marks easily. For your hull, use Premium Cleaner Wax to buff the stain away.

314G55	208 L	1	

Star brite® -46°C Antifreeze provides excellent cold weather and corrosion protection for drinking water systems and all engines. Its premium additive package prevents corrosion of aluminum, copper, brass and solder, but will not harm rubber, seals or hose materials. The 3X-dyed bright pink color provides excellent blow-through visibility. Formulated with virgin, non-toxic USP-grade ingredients. It contains no alcohols. This product is ready-to-use; do not dilute it.

Star brite® -46°C Antifreeze will provide burst protection to -46°C and freeze protection within a range of -11°C to -9°C. When testing with a refractometer designed for use with propylene glycol, freeze point readings on the PG scale will range from -11°C to -9°C. Note: The burst point of PVC pipes used in most drinking water systems is about -23°C. When winterizing water systems in regions where temperatures can fall below -23°C, we recommend using Star brite® -73°C Antifreeze.

91820	96,5 X 122 cm Single Weight	200 Bail / 1 Bail

- Special absorbent material soaks up oil and fuel but repels water
- Absorbs up to 15 times its weight in oil/fuel
- Great for bilge areas, engine rooms or anywhere oil or petrochemicals are spilled
- Helps protect the environment
- Virgin material does not shred like recycled imitations

WHAT IS STAR TRON®?

Star Tron® is a unique, multifunctional fuel additive that solves most fuel issues, including those related to ethanol blended fuels. Star Tron® has been solving fuel problems in engines across the US since 2003. It will improve the performance of all boats, cars, trucks, motorcycles, snowmobiles, ATVs, PWCs, generators, lawn & garden equipment. Star Tron® is safe for use in all gasoline-powered engines under all conditions, Star Tron® is an ideal all-season, all-purpose additive, and does all this at one of the lowest costs per liter of any fuel additive.

Be careful of what additive you use – many contain alcohol. Adding more alcohol to ethanol fuels can lead to engine problems. Read the MSDS of any fuel additive before using it with ethanol fuel. Star Tron® does not contain any alcohol or other emulsifiers, and is 100% safe for use in all ethanol blends from E5 to E85. Star Tron® is easy to use, effective and cannot be overdosed.

FUEL 101: WHAT YOU NEED TO KNOW ABOUT MAINTAINING FUEL QUALITY

COMMON FUEL PROBLEMS OF GASOLINE AND ETHANOL-BLENDED FUEL

Star Tron® Enzyme Fuel Treatment has been improving fuel quality in the US and Canada for more than 10 years, and is now available in Europe. A true multifunction fuel treatment, Star Tron® will improve the performance and reliability of all engines.

PROBLEM 1: FUEL STABILITY AND DEBRIS IN FUEL AND FUEL SYSTEMS

Fuel intended to be used for 30 days or longer after purchase needs to be stabilized. As fuel ages it can form harmful gums and other solids that leave deposits throughout the fuel system. Carburetors, fuel pumps, injectors and the fuel tanks become gummed which makes the engine run poorly and hard to start, resulting in engine knock, lost performance, and rough idle. It is especially important to stabilize ethanol/gasoline blends which degrade much faster than traditional gasoline.

STAR TRON® SOLUTION: Star Tron® is a powerful fuel stabilizer which helps prevent fuel breakdown for up to two years. This results in easier starts, more power and prevents pinging and knocking. Star Tron® improves octane levels of sub-standard, non-spec or old fuel. In many cases, Star Tron® can rejuvenate stale fuel, restoring it to serviceable condition. Star Tron®'s enzymes break down gum and other debris into sub-micron sized particles that can be dispersed throughout the fuel and easily "burned" during the combustion process, restoring full performance and fuel efficiency.

PROBLEM 2: WATER IN FUEL

Water in fuel will degrade combustion, affect the octane level and can cause damage to internal components such as fuel pumps and injectors. As the amount of water in the fuel increases, engines begin to run rough or even stall. Ethanol fuel is even more likely to be affected because alcohol naturally attracts water from the atmosphere. Water in fuel can lead to phase separation when water and ethanol form a chemical bond and fall to the bottom of the fuel tank.

STAR TRON® SOLUTION: Star Tron®'s enzyme formula treats water by reducing the surface tension between fuel and water, reducing the size of the molecular water clusters. This allows more water to be dispersed throughout the fuel as sub-micron sized droplets that can be safely eliminated as the engine operates. Star Tron®-treated fuel allows more water to be burned off than with untreated fuel, drying out the tank and preventing water buildup.

PROBLEM 3: DECREASED POWER AND PERFORMANCE

Today's fuels have been designed to burn very cleanly, but at the expense of power and performance. The same ingredients used to improve emissions and control corrosion have some negative effects; less combustibility, decreased fuel economy and shorter shelf life. These effects are worse in ethanol blended fuels.

STAR TRON® SOLUTION: Star Tron®'s enzyme formula helps to break apart large clusters of fuel molecules, creating more surface area. This allows additional oxygen to react during combustion, which results in a more complete burn of the fuel, improved fuel economy, engine power, throttle response and reduced toxic emissions. Star Tron® removes carbon deposits, keeping your engine clean and operating at peak performance.

UNZIP IN A ZIP

NON-STAINING

Don't get stuck with a stuck zipper!
Star brite Snap & Zipper Lubricant reduces friction, won't wash off, and—most importantly—helps prevent corrosion & irritating salt crust.

Exclusive PTFE[®] polymers coat both metal and plastic snaps and zippers to keep them snapping and zipping in all temperatures and conditions, but won't stain your expensive gear.

Don't get stuck! Get Snap & Zipper Lube.
