SprayMax®

Marine 2K Epoxy anti-corrosion primer red-brown 400 ml

Art. Nr. 688010

Product

Description / Purpose

Properties

Material base

Colour

Gloss level

VOC Value (EU)

2-component epoxy anti-corrosion primer for steel and aluminium boats. This product offers excellent anti-corrosion protection and is therefore ideal for coating new parts or restoring existing components.

- · Offers excellent anti-corrosion protection
- · Suitable for above and below the water line
- · Can be used without intermediate sanding

Two-component epoxy resins

Activator: amines

Red-brown

matt

640 g/l

Substrate

Iron (cleaned and sanded)

Steel (cleaned and sanded)

Cast iron (cleaned and sanded)

Galvanised steel (cleaned (ammonia-water solution

containing a wetting agent) and sanded)

Aluminium (cleaned and sanded)

Non-ferrous metal-limited adhesion (cleaned and sanded)
Old paint and factory paint (cleaned and sanded)

The damaged area must be dry and free of grease and dust and all rust needs to be removed.

Processing

Protection measures

Wear personal protection equipment.
(respiratory mask/gloves/goggles)
For more information, see safety data sheet.

Shake

Before activating, shake can thoroughly for 2 minutes from when the mixing balls are heard.

Place red button

Remove the red button from the cap. Turn the can by 180° and fit the button onto the pin.

Press red button

Turn the can upside down and place on a firm surface. Press the red button with the palm of your hand until it clicks into place.

Shake

After activating, shake can again thoroughly for 2 minutes, again from when the mixing balls are heard.

Adjustable Nozzle

Set the variable spray nozzle to the size and pattern of the damage.

Spray to test

After shaking the can, test spray and check compatibility with the surface and the colour.

Spraying distance

10 cm - 20 cm

Spray passes

Dry film thickness 80 - 200 μm (approx. 2 - 4 spray coats)

Flash-off time

Flash time: approx. 5 - 10 min between each spray coat.

Processing conditions

Optimum application at 18° C - 25° C and a relative humidity from 40 - 60 %.

Coverage

approx. 0,25 m² at 150 µm dry film thickness

Drying

TG1 dust dry: 1.5 h

TG3 dry to touch: 3 - 5 h

Ready for sanding:

24 - 48 hours (after adequate drying)

The stated values refer to the above-mentioned processing conditions. The level of dryness is determined pursuant to DIN 53150.

End flash-off time

End flash time approx. 5 h (before processing)

Continue

Can be topcoated within 30 days without intermediate sanding (if there is no chalking or other soiling)

After 30 days the surface must be sanded. Possible subsequent coats: Marine 2K epoxy primer filler, epoxide filler compounds, polyurethane systems, antifouling systems.

Before coating: P 80 - P 120 coarse sanding;

P 120 - P 240 final sanding After drying: P 240 - P 400

Pot life

Approx. 48 h at 20° C room temperature and a relative humidity of approx. 40 - 50 %. The processing time depends on the ambient temperature. Higher temperatures reduce the pot life, lower temperatures will prolong it. Do not process below room temperature.

Finish

After painting, turn the can upside down and spray the valve until empty.

Additional Information

Important Information

Avoid bumps, friction and impact.

Water load should only be allowed after 5 - 7 days.

Shelf Life

36 months (not activated)

The usage period refers to an unused can that is stored correctly at a temperature of 15 - 25° C and a relative humidity below 60%. The can must be stored and transported in an upright position in a dry place where it is protected against chemical and mechanical influences. The safety information on the can and all statutory provisions applicable for the storage site must be observed.

Disposal

The completely emptied spray cans must be disposed of in the recycling system. Cans with hardened material must be disposed of as special waste.

Note

For professional use only.
